1. Release notes

November 2025

OpenText eDirectory CE 25.4 resolves several previous issues. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure our products meet all your needs. To download this product, see the [Software License and Download](#) portal.

1.1. What's new?

Updates for dependent components

This release adds support for OpenLDAP version 2.6.8.

Operating system support

In addition to the platforms supported in previous releases of OpenText eDirectory, this release adds support for the following operating system:

- Red Hat Enterprise Linux (RHEL) 10
- SUSE Linux Enterprise Server (SLES) 15 SP7
- Red Hat Universal Base Image 9.6 (Docker)

1.2. Discontinued functionality

Starting from version 25.4, NMAS HOTP and SAML method are deprecated and will no longer be supported in OpenText eDirectory.

1.3. Software fixes

This release includes the following software fixes:

Component	Issue ID	Description
eDirectory	OCTCR56A572291	The replica view under Partition Management displays invalid information when any replica server is down in a multi-server setup.
	OCTCR56A571846	Upgrading from version 9.2.7 results in high utilization during group searching with nested groups.
	OCTCR56A573723	Identity Console 1.7.1 does not display all the replicas for a server.
	OCTCR56A602098	OES servers with XREF objects return -602 errors while running the time sync report.
	OCTCR56A660255	Idapsearch returns invalid results when querying both member and staticmember in a dynamic group.
	OCTCR56A679105	Changing the password using the SNMP sub-agent triggers endless logging and fills up available memory space.

Component	Issue ID	Description
	OCTCR56A690160	ldapsearch displays incorrect results for static and dynamic group members.
	OCTCR56A727271	The Role Service Driver removes <code>nrfDynamicGroupMembership</code> , impacting both users and dynamic groups.
NDS Server	OCTCR56A626227	ndsd crashes when DIB cache is configured in iMonitor.
LDAP	OCTCR56A729104	LDAP query results are inconsistent.

1.4. System requirements

For information about prerequisites, hardware requirements, and supported operating systems, see the [Installation guide](#).

1.5. Install or upgrade

You can upgrade to OpenText eDirectory 25.4, from version 9.2.x, 9.3.x. If you have Enhanced Background Authentication (EBA) enabled in versions 9.2.8 or 9.2.9, you can upgrade to version 25.4. For more information, see the [Migrating OpenText eDirectory](#) in [Installation guide](#).

Note

- OpenText eDirectory 25.4 supports OpenText Identity Manager 24.4 (v4.10) and later.
- You must upgrade OpenText Identity Manager before using this version of OpenText eDirectory. For more information on the version compatibility, see [OpenText Identity Manager component versions table in the System requirements](#).

1.6. Additional documentation

OpenText Identity Console

For more information, see [OpenText Identity Console](#) home page.

If you have eDirectory 9.2.9 or 9.2.8 and Identity Console 1.8 on Linux, you must upgrade OpenText Identity Console to version 25.4 before upgrading OpenText eDirectory to version 25.4.

Novell International Cryptographic Infrastructure (NICI)

The NICI Administration Guide is included in the [OpenText eDirectory documentation page](#).

OpenText eDirectory issues on Open Enterprise Server

For more information on OpenText eDirectory issues on Open Enterprise Server (OES), see [OES Readme](#).
